

REACH Regulation – Compliance of Norres Baggerman products

Norres Baggerman provides information on the REACH Regulation (as of 04/02/2026)

Regulation (EC) No 1907/2006 (REACH) concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals entered into force on 1 September 2008.

As a manufacturer of articles, we have the status of a “downstream user” within the supply chain. We are neither a manufacturer of substances nor of mixtures and are therefore not subject to the pre-registration obligation.

We are aware of the requirements of the REACH Regulation and are continuously engaged in its implementation and review. This includes regularly checking the current Candidate List and obtaining corresponding confirmations from our suppliers. To date, all of our suppliers have confirmed the continued availability of the raw materials used. This means that the availability of our products also remains assured.

In accordance with Article 33 of the REACH Regulation, we hereby inform you that some of our products contain SVHC in a concentration of more than 0.1% by mass, according to the Candidate List dated 04/02/2026. The affected products can be found in the table below. The substances concerned are as follows:

- Lead (CAS No. 7439-92-1) / EC No. 231-100-4
- Nickel (CAS No. 7440-02-0) / EC No. 231-111-4
- Triphenylphenol (CAS No. 3140-01-0)

According to the confirmations available to us from our plants, our other articles do not contain any SVHC substances in declarable quantities in accordance with the Candidate List dated 04/02/2026. Impurities are excluded from this statement.

We would like to point out that the hoses and fittings supplied by us are intended for professional use. We assume that the requirements set out in Section 6 of the German Ordinance on Industrial Safety and Health, “Basic protective measures when using work equipment”, are complied with.
